

PARTICIPANT INFORMATION SHEET

OtoSurg 1

EMORY
UNIVERSITY

What is OtoSurg 1?

There are variations in the safe provision of pediatric tonsil surgery worldwide. However, these variations have not been well studied. To bridge this knowledge gap, we are conducting the OtoSurg 1 study.

What would participating involve?

- The course of your treatment will be monitored to collect data.
- All data collection is fully anonymized to protect your privacy and includes:
 - Medical records
 - Tonsillectomy history – diagnosis, surgery, and post-operative recovery
- Your participation in this study will not affect the care that you receive in any way.
- Your participation in this study will not require any extra tests or procedures.
- You may withdraw from the study at any time.
- If you wish to participate, all you must do is sign a consent form.

What are the risks and benefits of participating?

- Participating in this study will not influence any clinical decisions or treatments you will receive.
- We will provide you with the best standard of care treatment that we provide to all our patients, regardless of involvement in this study.
- There is no additional risk to taking part.
- The information collected from you will be invaluable in standardizing pediatric tonsillectomy care worldwide and will help promote better patient outcomes globally.

Further Information

- If you have any questions, please ask your doctor or the research team about any aspect of this study.
- You can also visit us on our website for additional updates and information.
